

Checklist for Go live

General

- Make sure that privacy policy and terms of use are updated to the site specific ones.
- Make sure that SMTP server and outgoing email address are configured and emails are sent out.
- Reboot test: restart all the nodes where Waldur components are running, application should recover automatically.

Security

- Remove or disable default staff accounts.
- Generate a new random secret key.

Backups

- Make sure that configuration of Waldur is backed up and versioned.
- Assure that DB backups are performed, i.e. backups are created when manually triggering.
- Assure that DB backups files are on a persistent storage, preferably outside the storage used for Waldur's database.

Air-gapped deployments

- Make sure that Waldur docker images are mirrored to a local registry.
